

The IT Set up of SECR has been functioning since its formation of the new zone. Because of multiple activities involving train operation, customer service and office automation, there exists separate nodal setups to effectively monitor, co-ordinate and manage various projects activities, as mentioned hereunder:

- SECR Website management and interacting with all departments for its updation and CRIS for its hosting.
- Running the SEC Railways Office Automation & Documentation system i.e, SECROADS.
- Overall IT infrastructure development and co-ordination.
- Organising the SECR-IT-co-ordination committee meetings, a platform to share and discuss the IT related activities of all Departments of SECR.
- Training of staff and officers.
- Co-ordination with S&T Dept. in the matter related to Networking.

Coordination and contract management for Running of various MIS in SECR, concerning all Departments viz.

- Prime (Pay Roll & Related Independent Modules Engineering)
- Afress (advance Finance Railway Earning & Expendature System)
- MMIS (Material management Information System).
- Oss (Operating Statistics System)
- PMIS (Personnel Management Information System)
- COMIS (Commercial Management Information system)
- IPMS (Integrated Project Management System)
